

## **OE- 930, Advanced Electrical Gauge & Power Supply indicator Test Set**

**The test set can operate three different modes- low battery indication for NVD's, direct voltage to electronic products, and Timer mode.**

The OE- 930, Advanced Electrical Gauge & Power Supply indicator Test Set is an electrical kit that enables testing up to 5 units simultaneously for the required for operational status power supply, mainly during the manufacturing and maintenance stages.

With Optronic's' Advanced Electrical Gauge & Power Supply indicator Test Set, this operation is fast, simple and easy.

The system operates using a self-contained rechargeable battery with extended operation life that allows for easy mobility and performance in the field.

The Test Set Kit goes through a quality control process to meet high standard manufacturing, performance and safety regulations.

## Main Features:

- ✓ Capable of operating with a variety of night vision devices
- ✓ Operates on 5 units simultaneously
- ✓ Timer Mode- for the routine maintenance of maintaining NVD's longevity.
- ✓ Easy to assemble and operate
- ✓ Rechargeable battery
- ✓ ITAR free

## Kit Components:

- ✓ Main Test Set Unit
- ✓ Alligator Clip to Banana plugs
- ✓ 5 different Dummy Battery Types
- ✓ Battery charging unit (12V/24V/110V/220V)
- ✓ Operation manual
- ✓ Heavy duty case
